Follow this lesson plan if you are learning from Level 5 but would like to accelerate the process to a higher level. Simply move on to the next step once you've reached the desired level. You must be enrolled in all the theory courses up to the level you wish to learn. You will need the Celebrate Theory textbooks for each level you will be going through. For example, if you are learning up to Level 7, *you will need the textbooks for Level 5, Level 6, and Level 7.*

The **suggested homework is the textbook exercises for your level only.** For example, if you're planning on taking the Level 7 Theory exam, follow the lesson guide up to the Level 7 unit and only complete the homework in the Level 7 textbook.

View the lessons in the following order.

## **Lesson 1: Pitch, Notation, Keys, and Scales, Transposition**

Level 5 Unit One > Level 5 Unit Three > Level 6 Unit Two > Level 7 Unit Two > Level 8 Unit Three

## **Lesson 2: Rhythm**

## **Exam Walkthrough**

Proceed to the exam walkthrough of your desired level. This is found in the online course module after the textbook material. You will need the Official Examinations 2018 edition of your level.

## **Practice**

Now it's your turn to practice! Complete examinations from other years (2017, 2019 etc.) and either have your private teacher correct them for you or send them to me for evaluation. More information about submitting work to me can be found on the online course module.

Best of luck!
